

UVA Community Credit Union selects ICI for Image Exchange and Branch Capture Implementation Assistance

McLean, VA, February 21, 2007 - UVA Community Credit Union has engaged ICI Consulting to assist with their Check Image Exchange and Branch Capture Implementation Process.

“UVA Community Credit Union will be implementing Image Exchange and Branch Capture processing for the first time, said Leslie Robinson Vice President for of Information Systems at UVA Community Credit Union. “We retained ICI because we want to make sure that the conversion is a seamless endeavor without any surprises. ICI also did a fine job assisting us with the Vendor Evaluation process from drafting the RFPs to the contract negotiation,” added Leslie Robinson.

“The big question for all banks and credit unions is: what is the most cost effective way to move forward in an Image Exchange environment?” noted Greg Schratwieser, ICI President and CEO. “Will there be an appropriate ROI to implement Branch or Merchant Capture, Back Office Conversion along with image exchange? ICI assisted UVA Community Credit Union in determining that there was an excellent business case for Branch Capture and Image Exchange.”

“During the Implementation Process, there are a number of workflow, policy and availability issues to consider. ICI will be constructing a comprehensive Project Plan designed to ease UVA’s conversion process,” added Greg Schratwieser.

About ICI Consulting

Since 1994, ICI has assisted financial institutions assess, cost justify, evaluate and implement check imaging (image archive, exchange, remote capture), core processing, lockbox, lending, branch and internet solutions. ICI remains objective by not having financial relationships with any hardware, software or outsourcing vendors.
